

# Networks Project - By Narinder

Goodput calculated after every 1000 segments and averaged over 10000000 segments : 0.099997

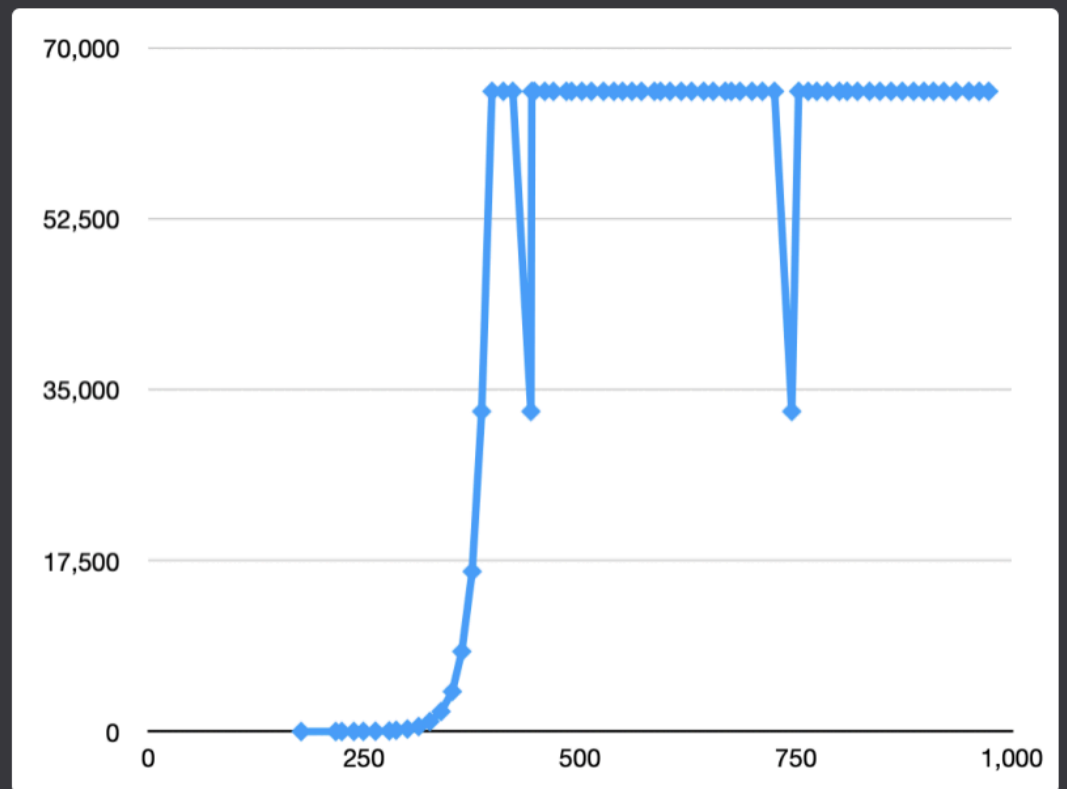

```
/Library/Java/JavaVirtualMachines/jdk-18.0.1.1.:  
Listening...  
Packet Received!  
A client is trying to connect...  
Client Ip:/172.20.10.5  and Port:6564  
Setup information recieved!  
server_isn =0    and  receivedSeqNum = 0  
Replying Client with ack: 1  
Connection Established Successfully!
```

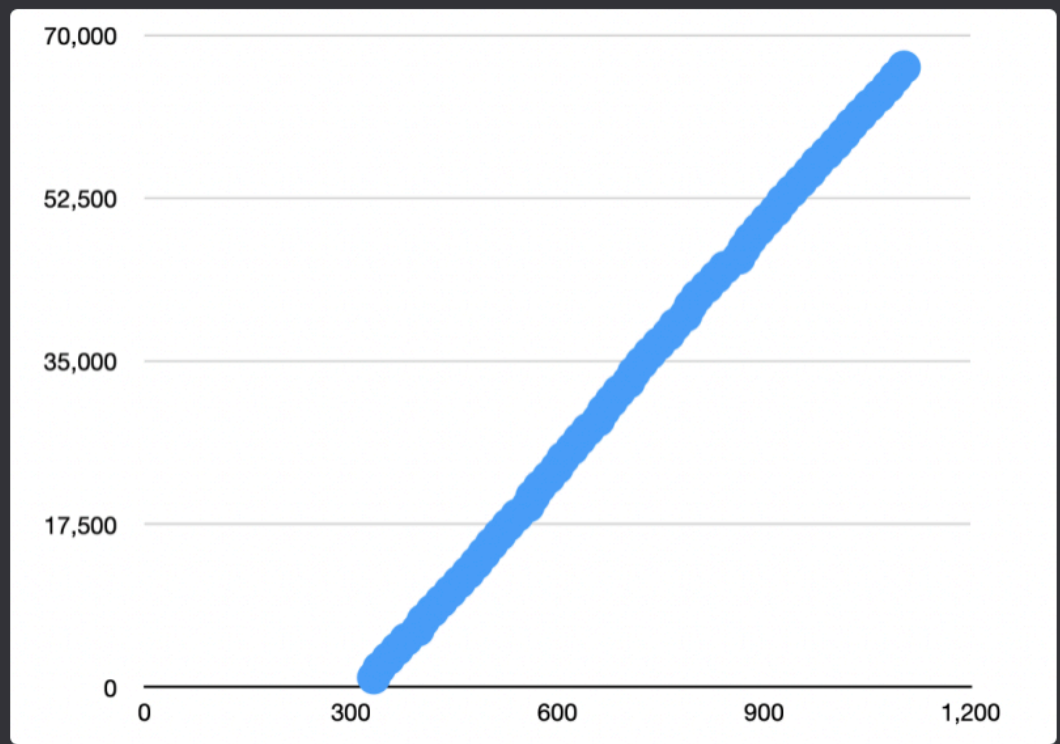

Packets Sent: 66

Packets Received: 66

Time vs window size on two machines

Time on x axis vs received packets on two different machines

## Time on the x-axis vs dropped sequence numbers
